

Visiting Vehicle Vector Support Splinter Group Summary

**Aaron Frith/JSC GC
Thomas Holmes/JSC GC
Melvin Calhoun/GSFC SMM**

Agenda

-
- **Background**
 - **Forward Plans**
 - **Vector Management ISI**
 - **Conclusion**

Visiting Vehicle Vector Support Splinter Group Summary

- **Purpose: Discuss a plan to address the HTV-3 lock anomaly that occurs during the post undock phase of the mission.**
- **Discussion Highlights**
- **TOPO will update the vectors more often for visiting vehicles to prevent late acquisition problems from occurring in the future:**
 - **An updated vector will be sent out at a designated time between post departure and re-entry (18 to 24 hours)**
 - **GSFC SMM will generate an ISI**

Visiting Vehicle Vector Support Splinter Group Summary
